

# Security Awareness Training and Simulated Phishing Platform

Helps you manage the problem of social engineering

## Kevin Mitnick Security Awareness Training 2016

Old-school Security Awareness Training doesn't hack it anymore. Today, your employees are frequently exposed to sophisticated phishing and ransomware attacks.

### Baseline Testing

We provide baseline testing to assess the Phish-prone™ percentage of your users through a free simulated phishing attack.

### Train Your Users

On-demand, interactive, engaging training with common traps, live Kevin Mitnick demos and new scenario-based Danger Zone exercises.

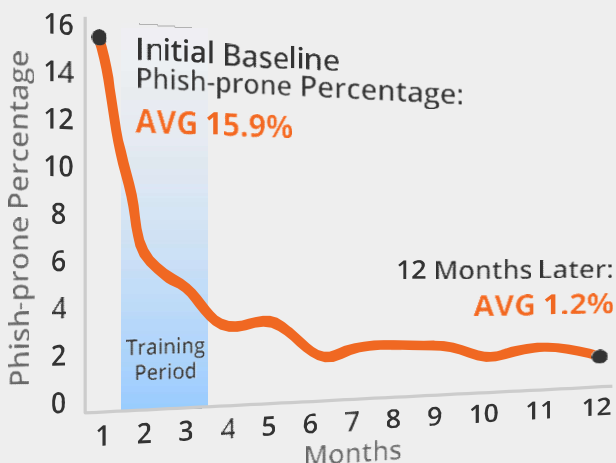

### Phish Your Users

Fully automated simulated phishing attacks, hundreds of templates with unlimited usage, and community phishing templates.

### See the Results

Enterprise-strength reporting, showing stats and graphs for both training and phishing, ready for management. Show the great ROI!

## The System Really Works

After a year of helping our customers train their employees to better manage the urgent IT security problems of social engineering, spear phishing and ransomware attacks, we decided to go back, and look at the actual numbers over those 12 months.

We aggregated the numbers and the overall Phish-prone percentage **drops from an average of 15.9% to an amazing 1.2% in just 12 months**. The combination of web-based training and frequent simulated phishing attacks really works.

# Kevin Mitnick Security Awareness Training 2016 Features

## Security Awareness Training

KnowBe4's Security Awareness Training specializes in making sure employees understand the mechanisms of spam, phishing, spear phishing, malware and social engineering.

You get high quality web-based interactive training combined with common traps, live demonstration videos, short comprehension tests and scenario-based Danger Zone exercises. When it comes to rolling out training for your users, KnowBe4's Automated Training Campaigns do the heavy lifting for you.

- On-demand, browser-based training featuring "The World's Most Famous Hacker"
- Multiple awareness training modules available
- Create multiple training campaigns as ongoing or with a specified completion date
- Automated enrollment and follow-up emails to "nudge" users who are incomplete
- Auto-enroll new users added to a group or company
- Point-of-failure training auto-enrollment
- Dedicated Hosting Options, or run the course in your own LMS

## Advanced Features

**EZXPloit™:** Patent-pending functionality that allows an internal, fully automated "human pentest". Launch a simulated phishing attack - which if clicked on - comes up with a secondary ruse like a Java popup that the user is social engineered to click on. If the user clicks on the secondary action, their workstation can be scanned for several things like user name, IP address and other data related to that user's workstation and Active Directory as specified by the admin.

**USB Drive Test™:** Allows you to test your user's reactions to unknown USBs. You can download a special, "beaconized" Microsoft Office file from your KnowBe4 admin console onto any USB drive which you can drop at an on-site high traffic area. If an employee picks up the USB drive, plugs it in their workstation, and opens the file, it will "call home" and report the fail. Should a user also enable the macros in the file, then additional data is also tracked and made available in the admin console.

**GEO-location:** See where your simulated phishing attack failures are on a map, with drilldown capability and CSV-export options.

**Vulnerable Browser Plugin Detection:** Automatically detect what vulnerable plugins any clickers on your phishing tests have installed in their browsers.

## Phishing

KnowBe4's highly effective scheduled Phishing Security Tests

keep your employees on their toes with security top of mind. Within the Admin Console you are able to schedule regular Phishing Security Tests from our large library of known-to-work templates, or choose a template from the community templates section where you can also share phishing templates with your peers.

- Unlimited year-round simulated phishing attacks
- Full library of successful phishing templates
- Easily create your own templates
- Customizable landing pages
- Customizable "hover-links" when a user "mouse-overs"
- Tests for opening MS Office attachments and secondary action of enabling macros.
- Set-it-and-forget-it scheduling of attacks and campaign length
- "Anti-prairie dog" campaigns that send random templates at random times preventing users warning each other
- Phish Alert Outlook add-in button gives your users a way to report simulated and non-simulated phishing attacks
- Phishing Security Tests using IVR attacks over phone

## Reporting and User Management

KnowBe4's robust reporting capabilities allow you to easily access user training completions, Phish-prone percentage, compliance reports and more.

- Advanced Phishing Reporting provides powerful features, for instance, a report of phishing failures by group or manager and many more reports
- Utilize at-a-glance Training Campaigns Dashboard to see campaign status, completion percentage and individual progress
- Filter campaigns by recipient, delivered, opened, clicked, attachment, data entered, bounced, export in CSV
- Top 50 Clickers report
- Specify user needs to "Read and Attest" Security Policy for compliance
- Phishing Security Test results emailed to admin upon completion
- KnowBe4's **NEW Active Directory Integration** allows you to easily upload user data and saves you time by eliminating the need to manually manage user changes.
